(Confidential)

Routine.

This matter of the T water supply is becoming rather complicated. At the back of everybody's mind of course, and particularly that of the Durbar, is the feeling that the new agreement will never come into force owing to retrocession. But it is impossible to allow this contingency to influence our work at present and we have been going on in the assumption that the agreement will be ratified.

I venture to submit that it might be a good thing for the Resident to have a talk with the C.R.E. and Cooke on the general situation, Secy being present to raise certain specific points. Subsequently a talk with a representative of the Durbar, above officers being present, might help. If Resident agrees I might prepare a note on the various points that are causing us some trouble.

Resident. 19/5/33

It would be a help if a list was prepared of the various matters connected with, or arising out of, the T water supply scheme.

I should like then to study each of these questions. When I have done this I shall be able usefully to discuss them with the Ruling authorities, Presdt. W.C., or the Durbar.

I should be very glad if the list could be forthcoming as early as possible & a note but such

S.N. 167.

Express letter No. F. 188-A/30, dated the 16th May, 1933, from the Government of India in the Foreign and ----- Political Department.

With papers and note-early-please.

Id. C.T.C.P. Id.G.K.

The formation of the Reserve Fund referred to in P.U.C was first sanctioned by the Government of India in the ----- Military Department in para 3 of their letter No. 2812-M.W., dated the 27th September, 1897, to the Director General of Military Works. It consists of such portion of the fixed annual contribution paid by the Municipal Commission under Clause IV of the agreement of the 1st February, 1897, as subsequently amended, between the Secretary of State and the Municipal Commission, towards the estimated "Maintenance charges" of the water supply installation in the Station, as have not been actually expended. The Reserve Fund ----- amounted to Rs. 1,38,000/- on the 31st March, 1932.

S.N. 376/18-1894. Slip "W/5"

S.N. 93 Collection at slip "M"

In para 3 of his letter No. 7543, dated the 9th ------- November, 1932, Sir Richard Burke recommended to the Government of India that the above amount might be transferred to the Municipal Commission to meet the charge of installing meters in the Station. In telegram No. 68-A., dated the 18th January, 1933, the Government of India have informed th Resident that they are willing to refund to the Municipal Commission a lump sum of Rs. one lakh out of 1,38,000/- held in deposit account as an act of grace.

S.N. 119 Collection at slip "B"

S.N. 167 P.U.C. I

In the P.U.C. the Government of India consider that the payment of the amount of Rs. one lakh from the Reserve Fund to the Municipal Commission can ordinarily be made only when the control of the water supply is transferred to them and the necessary agreement superseding the present one is concluded. In para 4 of the P.U.C. they further add that

communicated to this Residency. The President promised to place this matter before the ordinary Municipal meeting on the 25th May, 1933 and send a reply in due course.

Vide S.N.376 18-1894 Slip "W/5"

In this connection it may be noted that 2/3rds of the capital cost of water supply was debited to Assigned Tract revenues and one-third to Military Funds. Under the ------ agreement dated the 1st February, 1897, 2/3rds of the cost of the maintenance of "H" system was met by the Municipal Commission and 1/3rd by the Military Authorities. It is therefore clear that the Assigned Tract Administration have got 2/3rds rights over the distribution system etc and the ---- Military one-third. This may be explained to the Government of India while sending a reply.

If approved a copy of P.U.C., with the papers referred to therein, (with the exception of S.N. 149 which was already sent to the P.M.C.) may be sent confidentially to the President, Municipal Commission, with the request that the views of the Commission may kindly be obtained and forwarded to this Residency at an early date.

Draft submitted for approval.

T. N. Thangavelu
M Dalias
25-5-1933.

Secretary.

I agree that a meeting might be held, as suggested by Secretary, with a view to trying to settle the questions involved without further delay. The meeting might be held towards the end of next week. A copy of P.W.C.'s enclosures might be sent to the Pres., & also the Mily authorities if necessary, & date fixed for the meeting.

I have asked Mr. Pitt to let me have a list of outstanding questions connected with the water supply. This should be put up without further delay as these questions should be settled & it is necessary to understand clearly what matters remain to be settled.

27/6/33

The objections of the President Municipal Commission to the agreement coming into effect from the 16th of March 1933 are the following:

(i) The full quantity of water was not supplied till the end of March 1933.

(ii) Water of the agreed standard of purity was supplie only from June 1933.

(iii) No formal agreement yet exists in regard to the 'T' Scheme.

These points are considered below.

2

Item (i) of para 1 above, regarding quantity of water.

The period during which the full quantity is alleged to have been not available is only 15 days from the 15th to the 31st March which is a very short period. Even during ~~these~~ these 15 days the fact that full quantity required for station consumption was available for supply is evidenced by the following:-

(a) The Mysore Government had impounded sufficient supply when the scheme was given effect to

(b) The Resident had satisfied himself and given an assurance to the Municipal Commission that an adequate quantity of water had been stored to ensure a full and continuous supply to the station.

P. S. N. 125-126 (Z)

P. S. N. 188-B. (1)

(c) ~~(b)~~ The statement of the quantity of water supplied daily from 'T' tank and issued to the High Ground Reservoir during this period shows that an average of 3,988,750 millions gallons was supplied from 'T' Tank every day while the C & M Station actually consumed only an average of 1,666,250 gallons a day- This shows that Mysore Government were in a position to supply much more than the minimum quantity of 2 millions which the Secretary of State is liable to pay for under ~~the~~ clause 3 of draft Agreement A. Mysore Goverment have therefore fulfilled their part of

(B)

the

getting water from the 'T' scheme ~~from the 16th March~~ from 16th March 1933. i.e., taking a benefit under the agreement, ~~which would~~ The agreement would therefore be deemed to have come into effect from that date. What remains is only a formal ratification by the Government of India of an agreement which is already working. Apart from this, it is open to the contracting parties, the Government of Mysore and the Secretary of State to decide by mutual consent when an agreement is to come into effect - whether retrospectively or prospectively. Both the Government of Mysore and the Local Military Authorities have agreed to its coming into effect from the 16th March 1933.

(b). Agreement affecting ~~Regarding the position~~ the Municipal Commission. Commission's The position is determined by draft Agreement B., which is a separate agreement between the Secretary of State and the Municipal Commission. A draft of Agreement 'A' containing the provisions of clause 6 viz., "that the agreement shall come into effect from the date on which water is supplied continuously for beneficial use at the High Level Reservoir from the new reservoir of Thippagandanahalli" was accepted by the Municipal Commission in their resolution No.2 dated the 30th April 1931. We are not here concerned with the proviso to the resolution.

By passing this resolution the Municipal Commission made themselves participants in the new scheme with effect from the date on which the contingency referred to in clause 6 happened. In respect of this clause the Municipal Commission by their resolution of the 30th 4-31 are even more committed than the Government of India. The statement of the President Municipal Commission that no agreement exists, does not therefore appear to be correct. The Municipal Commission are ~~therefore~~ bound to accept the 16th March 1933 as the date for the commencement of the scheme and Agreement B.

If the Municipal Commission can make out a case that they ~~cannot~~ are not able to meet the charges for water supplied from

Secretary.

S.N. 186. Issued No. 5293, dated the 21st July 1933.

the exception of condition (e):-

Clauses 2, and 3 of the draft agreement include the conditions (a), (b), (c) and (d) mentioned in para 3 of S.N. 167/B.

For condition (f) viz. "The decision as to the necessity for carrying out renewal and the definition of a renewal as opposed to repairs will follow the general lines of the Secunderabad agreement", the following has been included under clause (3):-

"In the event of any dispute as to the necessity for a renewal or a repair of any portion of the said system the decision of the Engineer-in-Chief, Army Headquarters, shall be final and binding on both parties."

Clauses 4, 5 and 9 of the draft agreement includes conditions (i), (h), (j) and (g) referred to in para 3 of S.N. 167/B.

In this connection please see item (5) of the proceedings of a Conference held at the Residency on the 17th June 1933 in which the omission of condition (e) referred to above was accepted by the Military Authorities.

In the P.U.C. I. the President, Municipal Commission states that the Commission have accepted the terms of the draft agreement in regard to the New Water Supply scheme between the Secretary of State for India and the Municipal Commission.

Clause 14 of the draft agreement sent with P.U.C. I is not complete. Please see clause 14 of the draft agreement sent by Headquarters with P.U.C. III in which certain additions have been made. These additions will be included in the draft agreement to be submitted to the Government of India.

The date in clause 18 of the draft agreement is left blank. In memorandum No. F. 188-A/30, dated the 29th December, 1931, the Government of India decided that ~~further~~

Draft letter to Headquarters, Madras District, is -- submitted for approval. On receipt of their reply a draft letter to the Government of India will be submitted.

President

If the office will compare carefully clauses 15 & 16 of the copy of the draft Agreement received from P.W.D. with his letter No. G.C. 76/33, of 2/8/33, with the same clauses of the copy of the draft agreement sent to Southern Command with Madras Dist' letter No. 1838/283/E.4, of 8/8/1933 (copy endorsed to-day with copy of agreement) it will be

P.U.C. I
S. 193 at R

P.U.C. III
S. 195 at R

seen that they differ materially. This should be pointed out to C.R.E. & he should be asked which of the two is correct. If the copy we have rec'd. from P.W.C. is correct, then we might suggest to C.R.E. that he has dist. might, at very early date, send necessary correction slip to Southern Command.

× S.N. 193/L (R)

There is one other point regarding which we might consult C.R.E., namely, whether or not it would be equally correct & perhaps clearer if in the 3rd line of clause 16 of the copy of agreement received from P.W.C. the wording were:

"If the total Quantity of the Bulk-supply of water consumed in any one month"

instead of the present wording:

"If the total Quantity of water supplied in bulk & consumed in any one month"

At the same time if Supdt took file to C.R.E. & consulted him on above two points.

After that the draft below (Draft I) & the 2 drafts in linked file should be fair'd & issued without delay. Great care must be taken to ensure absolute accuracy of copy of draft agreement sent by us to P.W.C.

Government of India,

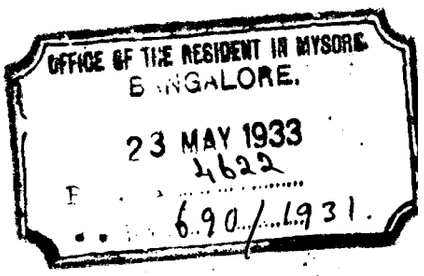
Foreign and Political Department,

EXPRESS LETTER.

From

Polindia,

Simla,



To

Resident Mysore,

Bangalore.

No.F.188-A/30. Dated, the 16th May 1933.

Bangalore Water Supply.

Reference your Express Letter No.2925 dated the 14th April 1933, letter No.2926/690-1931 dated the 14th April 1933, and your telegram No.2994 dated the 20th April 1933. The Government of India consider that the payment of the amount of Rupees one lakh from the Reserve Fund to the Municipal Commission can ordinarily be made only when the control of the water supply is transferred to them and the necessary agreement superseding the present one is concluded. Before the control is transferred, agreement would be necessary on two points:

(1) the rate at which water should be supplied to the Military Engineering Service by the Municipal Commission, and

(2) the conditions of loan of the present military-owned mains to the Commission.

2. As regards the first point, the Government of India do not think it a fair proposition that the military authorities

S.N. 118

authorities should pay for water at the same rate as is charged to Civil Consumers. A note by the Engineer-in-Chief on the subject is enclosed for your remarks in consultation with the Municipal Commission. Meanwhile further enquiries are being made of the Southern Command to make a more precise estimate of the actual cost of carrying the water in bulk to the point desired by the Military authorities from the point of supply by the Durbar, and a further reference will be made to you.

3. As regards the second point referred to in paragraph 1 above, a copy of a letter from the Quarter Master General in India to the Southern Command, No. 36552/6(E-4), dated the 30th March 1933, regarding the conditions on which the military authorities are willing to allow the Municipal Commission to take over the distribution system is forwarded herewith. The views of the Municipal Commission on the terms offered may please be obtained and communicated as early as possible.

S.N. 159 A

4. If, pending the consideration of the points referred to above, you are satisfied that the Municipal Commission require money urgently for the payment of meters, the Southern Command will authorise on your request advance payment of a sum of half a lakh rupees. This payment should however, be clearly subject to the condition that the Municipal Commission accept the liability to refund the whole or any portion of it that may be required for the maintenance of the existing system or for the rectification of any sudden breakdown that may occur before the new agreement is signed. The Government of India trust that you will endeavour to get an urgent settlement of the outstanding points to enable an early agreement to be drawn up.

Engineer-in-Chief's Note.

8.N.118

The points raised by the Hon'ble the Resident in Mysore are:-

(a) The rate of supply of water by the Municipal Commission to the Military Authorities and

(b) a guarantee by the Military Authorities for a minimum consumption of water daily.

2. As regards (a). It has been suggested by the Municipal Commission and supported by the Resident that the Military Authorities should pay the cost of water supplied at the same rate as other consumers in the Civil Station Area.

3. In suggesting this, the importance of the fact that the Military Authorities are to be given a bulk supply at definite points while the other consumers in the Civil Station will be given a house to house distributed supply appears to have been overlooked.

4. In addition the distribution mains have been provided by and at the expense of the Military Authorities and are being loaned to the Commissioners (see para 6 below). Whereas it is only equitable that the rate charged to other consumers should include an element to cover interest on the capital outlay involved, on the other hand the rate to be charged for the bulk supply to the Military Authorities should not include any element for interest.

5. The Municipal Commission will obtain water in bulk from the Mysore Government at a definite point @ 7.65 annas per thousand gallons. From that point the water will be conveyed to certain definite points (5 in No.) at which water will be delivered in bulk to the Military Authorities. The Commission are therefore entitled to charge the Military Authorities the rate at which payment is to be made to the Mysore

Government/

Government plus charges for bringing water to the bulk supply points for military areas.

6. These charges can be worked out for delivery of water at each individual bulk supply point or a flat rate can be arrived at for supply at all bulk supply points; the latter is preferable. In working out these charges, the element of interest on the initial costs of mains should be omitted as the mains were provided by the Military Authorities and are probably being handed over on loan to the Municipal Commission. The conditions of this loan have been communicated to the local Military Authorities.

7. It is not clear on what basis the figure of annas 1.8 per 1,000 gallons for the cost of distribution to Military storage tanks has been calculated and this will have to be referred to the local Military Authorities.

8. In the case of water supply arrangements at Secunderabad, similar arrangements were made for the supply of water by the Cantonment Authority to the M.E.S. and vice versa.

9. It is not the intention that the Military Authorities should gain at the expense of other consumers in the Civil Area but at the same time the Military Authorities should not in equity be charged more than what it would cost the Commission to supply water in bulk for military requirements.

10. In this connection it is pointed out that it would cost the Military Authorities Rs.50,000 to lay new pipes from the point of delivery from the Mysore Government to the five points of supply to the military areas, so that the Military Authorities could take water direct from the Mysore Government rising mains at 7.65 annas per 1,000 gallons and distribute it themselves to the five areas at a further cost of

1.5 annas per 1,000 gallons making a total of (8) annas 15 per 1,000 gallons delivered at the five areas.

11. If therefore the Municipal Commission desire to charge the Military Authorities for water delivered at the 5 military reservoirs at a rate per 1,000 gallons greater than (8) annas 15, it would be financially advantageous to lay the necessary mains to take the Military requirements direct from the Mysore Government (see A.H.Q. No.45235/2 (E.&), dated the 5th October 1932).

12. As regards (b). There is certainly no objection to give a guarantee for the minimum consumption of water based on a reasonable proportion of the estimated consumption. This will be provided for in the draft agreement between the Municipal Commission and the Secretary of State (Military Authorities). The actual figure will require examination and confirmation by the Military Authorities.

To

Headquarters,
Southern Command.

WATER SUPPLY, BANGALORE.

S.N.112/A. Your No.4234/33(E-4), dated 30th November 1932.

The question of the disposal of the balance of the Accumulated Deposit Fund is being dealt with separately. It has been recommended that the sum of Rs.1 lakh should be refunded to the C.& M. Commission as an act of grace. In this connection S.N.128 see memo. No.F.188/A/30, dated 8.2.1933, to the Hon'ble the Resident in Mysore (copy attached for information).

2. With regard to handing over the existing distribution system in the area to be controlled in future by the Commission as referred to in your paras. 8-10.

The proposal that the distribution system should be handed over free to the C & M. Commission is not accepted. The C.& M. Commission may however be permitted to use such portion of the distribution system as may be necessary and desirable consequent on handing over of control of supply to non-military areas to the Commission subject to the conditions in para. 3 below.

3. The conditions under which the C & M Commission may be permitted to utilise part of the existing distribution system will be embodied in the agreement governing the supply of water to the military areas and will cover inter alia the following points:-

(a) The C & M. Commission will pay a nominal rental of Rs.5 per annum.

(b) The portions of the distribution system will be xxxxxxx clearly marked on the plan and fully detailed in a schedule.

(c) The use of the said system will be permitted only as long as the water is supplied to the military areas in accordance with the agreement.

(d) The said system will be maintained and renewed as necessary at the cost and expense of the C.& M. Commission.

(e) Preferably the maintenance and renewal of the said system as in (d) above should be carried out by the M.E.S. as agents of the C.& M. Commission.

(f) The decision as to the necessity for carrying out renewal and the definition of a renewal as opposed to repairs will follow the general lines of the Secunderabad agreement.

(g) The C.& M. Commission will cease to use any portion of the said system if and when it is required by the military authorities for their own use.

(h) If and when at any future time the said system or any part of it is taken back by the military authorities in accordance with (c) or (g) above, no payment will be made to the

the C & M. Commission.

(i) The C & M. Commission may if they so desire carry out at their own cost and expense any additions to the said system which additions will remain the property of the Commission.

(j) The C.& M. Commission may, if they so desire and with the prior concurrence of the C.R.E., carry out at their own cost and expense any alterations to the said system such as replacing an existing pipe by one of larger size subject to the condition that if and when the military authorities resume the use of the pipes concerned in accordance with (c) or (g) above the C.& M. Commission will have no claim for any payment from the military in respect of the expenditure incurred on or the enhanced value of such alterations.
The pipe material replaced will become the property of the Commission.

4. Kindly confirm at an early date that the C.& M. Commission are prepared to concur in the conditions stated in para.3 above in which case they will be incorporated in the draft agreement submitted with your No.4234/56(E-4), dated 30.11933, now under scrutiny.

5. The proposals in your paras 12 and 13 with regard to the H and Y tank rising mains and plant are also concurred in and accepted subject to the proviso contained in your para 14.

No. G.T.43/33 CIVIL AND MILITARY STATION, BANGALORE.
MUNICIPAL OFFICE.
DATED 29th May 1933.

From

G. H. COOKE, ESQ., M. C., I. C. S.,
President, Municipal Commission,
C. & M. Station, BANGALORE.

To

The Secretary to the Hon'ble the Resident in Mysore,
Bangalore.

OFFICE OF THE RESIDENT IN MYSORE.
BANGALORE.
2 JUNE 1933
Regd. No. 4872
Encl. to

Water Supply - Bangalore.

With reference to your letter No.3161/690-1931, dated the 25th April 1933, asking me to obtain and communicate to you the views of the Municipal Commission on the terms proposed by the Army Headquarters, Simla, in their letter dated the 30th March 1933 to the Headquarters, Southern Command, in respect of the handing over of the Distribution System to the Commission, I have the honour to forward, herewith, for your information a copy of the Commission's resolution No.2 dated the 25th May 1933 on the subject.

2. Subsequent to the meeting on the 25th, I felt that the attitude taken up by the Commission in regard to the question of the ownership of the Distribution System was due to a misapprehension and with a view to arrive at a proper understanding, I discussed the matter with Major Kermack (C.E.), Captain Hext, the Municipal Executive Engineer and the Vice-President on the 26th. We now realize that the only reason for the inclusion in the terms of the clause relating to the payment of a nominal rental of Rs.5/- per annum by the Commission is to ensure the continued recognition of the Secretary of State's ownership of the Distribution System. As long as the system was controlled by the Secretary of State (through the Military), the question of the recognition of his ownership did not arise or need attention. But in the event of the system being handed over to the Municipal Commissi on, who are

P.T.O.

really <u>not</u> under his control in the same way that a Government Department is, then that ownership should be recognized by this nominal annual payment. I feel that I was at fault in not being able to make this point clear to the Commission at the meeting. While I agree with the Commission's objections to clauses (e) and (g), I feel sure that, on reconsideration, the Commission will agree to the implication which they felt unable to accept at the meeting on the 25th. I shall place the matter before the Commission for reconsideration at their meeting to be held next month and will write to you again after that meeting.

I have the honour to be,
Sir,
Your most obedient servant,

President, M. C.

MVL.
29-5-33.

Municipal Commission's resolution dated the 25th May 1933 (Ordinary meeting).

---

2. Letter dated the 25th April 1933, from the Secretary to the Resident asking for the views of the Municipal Commission in respect of the conditions proposed by the Army Headquarters, Simla, in the matter of handing over to the Commission the control of the Water Supply Distribution System.

Recommended that the terms proposed should be accepted with the exception of clauses 3 (e) and (g).

As regards clause 3(e), the Standing Committee consider that this would give rise to considerable administrative difficulty and would inaugurate an undesirable system of dual control. They consider that all items of maintenance and renewals should be carried out by the Commission.

Clause 3(g) would mean a reversion to a system which was altered so long ago as 1912 before which date the Military had a prior claim on the Water Supply. This clause should be omitted. The clauses in the agreement requiring the Commission to supply the needs of the Military at their reservoirs should provide all the safeguards necessary.

Resolved that the Secretary to the Hon'ble the Resident in Mysore, be informed that the Commission are unable to accept the suggestion underlying the letter from the Army Headquarters, Simla, to the Headquarters, Southern Command, under reference, viz. that the whole distribution system in the Station is the property of the Military. Before committing themselves by accepting such a suggestion, they desire to investigate in greater detail the question of what rights in the distribution system they may have acquired and in the meantime, it is resolved that they are unable to accept the terms proposed.

At the same time, apart from their general objection which applies to clause (a), the Commission are unable to accept clauses (e) and (g).

As regards clause (e), the Commission consider that this would give rise to considerable administrative difficulty and would inaugurate an undesirable system of dual control. They consider that all items of maintenance and renewals should be carried out by the Commission.

Clause (g) would mean a reversion to a system which was altered so long ago as 1912 before which date the Military had a prior claim on the water supply. This clause should be omitted. The clauses in the agreement requiring the Commission to supply the needs of the Military at their reservoirs should provide all the safeguards necessary.

I am desired to enclose a copy of the draft proceedings of the Conference held at the Residency Office on the 17th June, 1933, and to enquire whether you accept them as a correct account of what happened.

G. H. Cooke, Esq., M.C., I.C.S.,
President, Municipal Commission,
Civil & Military Station, BANGALORE.

PROCEEDINGS OF A CONFERENCE REGARDING THE 'T' WATER SUPPLY SCHEME HELD IN THE RESIDENCY OFFICE, BANGALORE, ON THE 17th JUNE 1933, at 11 A.M.

---:O:---

The meeting was presided over by Major G. Kirkbride, I.A., Secretary to the Resident in Mysore.

P r e s e n t.

On behalf of the Military Authorities.

1. Lieut.-Colonel M. E. Morgan, M.C., R.E., Commander, Royal Engineers.

2. Major H. N. Kermack, R.E., Garrison Engineer.

3. Captain F. M. Hext, R.E., G.E., E. & M.

On behalf of the Municipal Commission.

1. Mr. G. H. Cooke, M.C., I.C.S., President, Municipal Commission.

2. Mr. W. H. Murphy, Municipal Executive Engineer.

The agenda prepared by the Secretary to the Hon'ble the Resident were circulated among the members present, and the following conclusions were arrived at:-

1. Agreement known as Agreement A to be entered into between the Secretary of State and the Mysore Government in connection with the "T" Water Supply Scheme.

This was not considered as a reply is awaited from the Government of India.

2. Agreement known as Agreement B to be entered into between the Secretary of State and the Municipal Commission, Civil & Military Station, Bangalore, in connection with the "T" Water Supply Scheme.

The Commander, Royal Engineers suggests that he should write to Army Headquarters and say that he, in consultation with the Municipal Commission, is preparing a draft agreement to cover all points which will be submitted direct to the Government of India

(iii) With regard to the payment of water in Military owned or leased bungalows, the Commission will send their bills direct to the Garrison Engineer.

5. The conditions of loan of the present military (Secretary of State) owned mains to the Commission.

It was explained that the ownership ~~has~~ is 2/3rds Assigned Tract and 1/3rd Central (Army Department), the former represented by the Resident and the latter by the General Officer Commanding District both on behalf of the Secretary of State.

The Secretary of State is willing to allow the Municipal Commission to take over the distribution system on the following conditions:-

(a) The Civil & Military Station Municipal Commission will pay a nominal rental of Rs.5/- per annum.

(b) The portions of the distribution system will be clearly marked on the plan and fully detailed in a schedule.

(c) The use of the said system will be permitted only as long as the water is supplied to the Military areas in accordance with the agreement.

(d) The said system will be maintained and renewed as necessary at the cost and expense of the Civil and Military Station Municipal Commission.

(e) Preferably the maintenance and renewal of the said system as in (d) above should be carried out by the Military Engineering Services as agents of the Civil and Military Station Municipal Commission.

(f) The decision as to the necessity for carrying out renewal and the definition of renewal as opposed to repairs will follow the general lines of the Secunderabad agreement.

(g) The Civil & Military Station Municipal Commission will cease to use any portion of the said system if and when

when it is required by the Military authorities for their own use.

(h) If and when at any future time the said system or any part of it is taken back by the Military authorities in accordance with (c) or (g) above, no payment will be made to the Civil and Military Station Municipal Commission.

(i) The Civil & Military Station Municipal Commission may if they so desire carry out at their own cost and expense any additions to the said system which additions will remain the property of the Commission.

(j) The Civil and Military Station Municipal Commission may, if they so desire, and with the prior concurrence of the Commander, Royal Engineers carry out at their own cost and expense any alterations to the said system such as, replacing an existing pipe by one of larger size subject to the condition that if and when the Military Authorities resume the use of the pipes concerned in accordance with (c) or (g) above, the Civil and Military Station Municipal Commission will have no claim for any payment from the Military in respect of the expenditure incurred on or the enhanced value of such alterations. The pipe material replaced will become the property of the Commission.

Points (a) to (j) referred to above have been agreed upon, with the following modifications, and will be incorporated in agreement B to be entered into between the Secretary of State and the Municipal Commission. This agreement will be drafted immediately by Commander Royal Engineers and President, Municipal Commission as agreed in paragraph 2 above & submitted to the Resident.-

Clause 5(e) - The local Military Authorities will recommend to Army Headquarters to withdraw this clause as they do not want to do the work.

Clause 5(f)

Clause 5(f) - Similarly this clause also will go out.

Clause 5(g) will be withdrawn and in clause (i), after the word "system", add "subject to the concurrence of the Commander Royal Engineers".

6. Payment of Rs.1,38,000/- from the Reserve Fund to the Municipal Commission.

With regard to the Reserve Fund of Rs.1,38,000/- it has been agreed that one lakh should be handed back to the Commission of which half a lakh is immediately available. With regard to the balance of Rs.38,000/- the Government of India have been addressed to reconsider their decision of paying this back; should they not do so, it will be met from the Assigned Tract surplus revenues.

7. Introduction of the new water rates in the Civil and Military Station of Bangalore - Installation of meters.

The Resident's orders ~~xx~~ on this were explained to President, Municipal Commission.

8. Handing over a portion of the 15" rising main from the Combined Jewell Filters to High Ground Reservoir to Mysore Government.

The depreciated value of the rising main, (Rs.24,492/-) if and when received from the Government of Mysore, will be shared between the Mysore Assigned Tract and Central Government in the proportion of 2 : 1.

9. Request of the Municipal Commission to remove the pipe line laid a few years ago from the 'Hoskote' tank to the "Y" tank and use it for the work of laying a 15" in diameter main from the Service Reservoir to 12" in diameter pipe connection feeding the General Bazaar area in the Station.

The Commander Royal Engineers proposes to write to Army Headquarters and say that two-thirds of the 4,000 R.feet of pipe line is the property of the Municipal Commission and will recommend

former would probably be about 7 annas and it is very doubtful whether an Arbitrator would fix the cost below 7.65 annas. Everything seems to indicate that the Government of Mysore will stick to the 16th of March, 1933, as the date from which the agreement would come into force. If we do not accept that, we shall either have to refer the matter to arbitration as provided for in clause 7 of the agreement: or accept the Darbar's date. This will probably mean that with effect from the 16th of March 1933 the Military will only pay for what they actually consumed the balance being met by the Commission. The point raised in this paragraph is the only big outstanding question which we shall have to talk over with the Government of Mysore.

Sd. G. Kirkbride,
Major,

SECRETARY TO THE RESIDENT.

PROCEEDINGS OF A CONFERENCE REGARDING THE 'T' WATER SUPPLY SCHEME HELD IN THE RESIDENCY OFFICE, BANGALORE, ON THE 17th JUNE 1933, at 11 A.M.

---:O:---

The meeting was presided over by Major C. Kirkbride, I.A., Secretary to the Resident in Mysore.

P r e s e n t.

On behalf of the Military Authorities.

1. Lieut.-Colonel A. L. Morgan, M.C., R.E., Commander, Royal Engineers.

2. Major H. M. Hornsby, M.C., Garrison Engineer.

3. Captain D. M. Hunt, M.C., C. E., E. & M.

On behalf of the Municipal Commission.

1. Mr. G. H. Cooke, M.C., I.C.S., President, Municipal Commission.

2. Mr. W. H. Murphy, Municipal Executive Engineer.

The agenda prepared by the Secretary to the Hon'ble the Resident were circulated among the members present, and the following conclusions were arrived at:-

1. Agreement known as Agreement A to be entered into between the Secretary of State and the Mysore Government in connection with the "T" Water Supply Scheme.

This was not considered as a reply is awaited from the Government of India.

2. Agreement known as Agreement B to be entered into between the Secretary of State and the Municipal Commission, Civil & Military Station, Bangalore, in connection with the "T" Water Supply Scheme.

The Commander, Royal Engineers suggests that he should write to Army Headquarters and say that he, in consultation with the Municipal Commission, is preparing a draft agreement to cover all points which will be submitted direct to the Government of

India

India through the Residency.

3. Rate at which water should be supplied from "H" and "Y" Tanks in the event of "T" Scheme fails - Maintenance of "H" and "Y" Tanks.

It is agreed that the Darbar should not be asked to meet more than half the cost of the maintenance of "H" and "Y" tanks.

The Darbar have agreed to charge for water from Hessarghatta the same flat rate irrespective of the source and to re-imburse the Civil & Military Station authorities for any cost they incur in pumping water from Turbanhalli. Mr. ~~Ranga Rao~~ Rangiah has agreed verbally to the above in consultation with the Commander, Royal Engineers.

It is agreed that in regard to the maintenance of Hessarghatta tank and Turbanhalli pumping station, the Military and the Municipal Commission should pay in proportion to the actual water used during the year from all sources.

4. The rate at which water should be supplied to the Military by the Municipal Commission.

(i) The President, Municipal Commission, agrees to recommend to the Commission that they should supply water to the Military at the rate of 9.15 annas per thousand gallons in view of the fact that if they do not, the Military will probably take their water from the High Ground Reservoir which will definitely result in a loss to the Commission and also in view of the assurance of the Commander, Royal Engineers that the actual cost of water eventually received by the Military will be more than 12 annas per thousand gallons taking into account the cost of their internal distribution system.

(ii) The Commander, Royal Engineers agrees that a minimum of 1,80,000 gallons, with reference to this paragraph is a reasonable figure for water supplied to bulk points.

(iii) With regard to the payment of water in Military owned or leased bungalows, the Commission will send their bills direct to the Garrison Engineer.

5. The conditions of loan of the present military (Secretary of State) owned mains to the Commission.

It was explained that the ownership is 2/3rds Assigned Tract and 1/3rd Central (Army Department), the former represented by the Resident and the latter by the General Officer Commanding both District, on behalf of the Secretary of State.

The Secretary of State is willing to allow the Municipal Commission to take over the distribution system on the following conditions:-

(a) The Civil & Military Station Municipal Commission will pay a nominal rental of Rs.5/- per annum.

(b) The portions of the distribution system will be clearly marked on the plan and fully detailed in a schedule.

(c) The use of the said system will be permitted only as long as the water is supplied to the Military areas in accordance with the agreement.

(d) The said system will be maintained and renewed as necessary at the cost and expense of the Civil and Military Station Municipal Commission.

(e) Preferably the maintenance and renewal of the said system as in (d) above should be carried out by the Military Engineering Services as agents of the Civil and Military Station Municipal Commission.

(f) The decision as to the necessity for carrying out renewal and the definition of renewal as opposed to repairs will follow the general lines of the Secunderabad agreement.

(g) The Civil & Military Station Municipal Commission will cease to use any portion of the said system if and when

when it is required by the Military authorities for their own use.

(h) If and when at any future time the said system or any part of it is taken back by the Military authorities in accordance with (c) or (g) above, no payment will be made to the Civil and Military Station Municipal Commission.

(i) The Civil & Military Station Municipal Commission may if they so desire carry out at their own cost and expense any additions to the said system which additions will remain the property of the Commission.

(j) The Civil and Military Station Municipal Commission may, if they so desire, and with the prior concurrence of the Commander, Royal Engineers carry out at their own cost and expense any alterations to the said system such as, replacing an existing pipe by one of larger size subject to the condition that if and when the Military Authorities resume the use of the pipes concerned in accordance with (c) or (g) above, the Civil and Military Station Municipal Commission will have no claim for any payment from the Military in respect of the expenditure incurred on or the enhanced value of such alterations. The pipe material replaced will become the property of the Commission.

Points (a) to (j) referred to above have been agreed upon, with the following modifications, and will be incorporated in agreement B to be entered into between the Secretary of State and the Municipal Commission. This agreement will be drafted immediately by Commander Royal Engineers and President, Municipal Commission as agreed in paragraph 2 above & submitted to the Resident.-

Clause 5(e) - The local Military Authorities will recommend to Army Headquarters to withdraw this clause as they do not want to do the work.

Clause 5(f)

Clause 5(f) - Similarly this clause also will go out.

Clause 5(g) will be withdrawn and in clause (i), after the word "system", add "subject to the concurrence of the Commander Royal Engineers".

6. Payment of Rs.1,38,000/- from the Reserve Fund to the Municipal Commission.

With regard to the Reserve Fund of Rs.1,38,000/- it has been agreed that one lakh should be handed back to the Commission of which half a lakh is immediately available. With regard to the balance of Rs.38,000/- the Government of India have been addressed to reconsider their decision of paying this back; should they not do so, it will be met from the Assigned Tract surplus revenues.

7. Introduction of the new water rates in the Civil and Military Station of Bangalore - Installation of meters.

The Resident's orders ~~in~~ on this were explained to President, Municipal Commission.

8. Handing over a portion of the 15" rising main from the Combined Jewell Filters to High Ground Reservoir to Mysore Government.

The depreciated value of the rising main, (Rs.24,492/-) if and when received from the Government of Mysore, will be shared between the Mysore Assigned Tract and Central Government in the proportion of 2 : 1.

9. Request of the Municipal Commission to remove the pipe line laid a few years ago from the 'Hoskote' tank to the "Y" tank and use it for the work of laying a 15" in diameter main from the Service Reservoir to 12" in diameter pipe connection feeding the General Bazaar area in the Station.

The Commander Royal Engineers proposes to write to Army Headquarters and say that two-thirds of the 4,000 R.feet of pipe line is the property of the Municipal Commission and will recommend

recommend that the 2,800 R.feet be handed over to the Commission at once and any adjustment in cost will be made when the balance of this length is disposed of.

10. Date from which the "T" scheme shall take effect. (not on the Agenda)

The last point raised & probably the most important owing to its controversial nature was the date from which the "T" scheme shall take effect. The ratification of the agreement will not be very helpful because it will merely bring into force clause 6. The Government of Mysore would probably take their stand on clause 6 read with clause 2 and demand that the date from which the agreement will take effect should be the 16th of March 1933.

There have been certain days of which the worst were the 26th and the 27th May, when the Darbar were not in a position to supply the amount of water wanted by the Station. The only means we have of counteracting their demand are two: (i) to prove that the reason for the limited supply was due to an accident which was not beyond the control of the Maharaja. (ii) would be that the standard of water was not that laid down in clause (1). It is doubtful whether an arbitrator would find in our favour as regards the first point.

In regard to the quality of the water: up to date, the amount that the Darbar can claim under the agreement, from the 16th March to the 31st May, 1933, is about Rs.73,631/-*of which at the rate of 7.65 annas the cost of actual consumption of water amounts to Rs.64,000/-. It is clear that having taken the water we cannot refuse to pay for it. The question is whether we should pay at the rate of 7.65 annas for bad water. This figure of 7.65 annas was arrived at by combining the cost of raw water with the cost of filteration. The cost of the former

*

From 16th to 31st March 1933	-	Rs.15,300/-)
For April 1933.	..	Rs.28,687/8/-)
For May 1933.	..	Rs.29,643/12/-)
		Rs.73,631/4/-)

former would probably be about 7 annas and it is very doubtful whether an Arbitrator would fix the cost below 7.65 annas. Everything seems to indicate that the Government of Mysore will stick to the 16th of March, 1933, as the date from which the agreement would come into force. If we do not accept that, we shall either have to refer the matter to arbitration as provided for in clause 7 of the agreement: or accept the Darbar's date. This will probably mean that with effect from the 16th of March 1933 the Military will only pay for what they actually consumed the balance being met by the Commission. The point raised in this paragraph is the only big outstanding question which we shall have to talk over with the Government of Mysore.

Sd. G. Kirkbride,

DRAFT AGREEMENT 'B'.

Memorandum of Agreement made this day of One Thousand Nine Hundred and Thirty between the Secretary of State for India in Council (hereinafter referred to as the Secretary of State which term shall include the Secretary of State party hereto, his successors in office and assigns) of the one part and the Municipal Commission of the Civil and Military Station of Bangalore represented by G. H. Cooke, Esq., M.C., I.C.S., President and

the present Municipal Commissioners for the Civil and Military Station of Bangalore (hereinafter referred to as the Commission which term shall include the said Commissioners parties hereto, their successors in office and assigns) of the other part.

WHEREAS under an Agreement dated the 1st of February 1897 as modified by subsequent Agreements between the Secretary of State and the Commission it was agreed that the Secretary of State should provide a supply of water for the use of the Commission from the Chamarajendra Reservoir on certain terms and conditions more fully set out in the said Agreement and its modifications:

And whereas the supply of water from the Chamarajendra Reservoir was found to be inadequate to meet the requirements of the City and the Civil and Military Station of Bangalore in recent years:

And whereas under an Agreement dated the between the Secretary of State for India in Council and His Highne the Maharaja of Mysore, the Maharaja has agreed to supply to the High Ground Reservoir from the new reservoir constructed across Arkavati River, below its confluence with the Kumudvati, on th Magadi Road, near the village of Thippagondanahalli, all such quantity of filtered water that the Civil and Military Stat

require subject to a maximum of 2½ million gallons per day for the present on certain terms and conditions more fully set out in the said agreement:

And whereas the Secretary of State ~~hath~~ has agreed and does hereby agree to supply to the Commission the water delivered to him at the High Ground Reservoir by the Maharaja of Mysore and to give them the full benefit of the above Agreement and any modifications that may hereinafter be made in it subject to the conditions relating to the supply of water to the Military Authorities as hereinafter provided:

And whereas the Secretary of State has agreed and does hereby agree to transfer the control of the distribution of water from the High Ground Reservoir to the Commission and whereas the said Commission have agreed to assume the responsibility for the distribution throughout the Civil and Military Station of Bangalore from

Now these presents witness and it is mutually agreed between the parties hereto as follows:-

1. In consideration of the Secretary of State supplying water to the Commission, the Commission shall pay to the Secretary of State, or as the Secretary of State may direct, for the water supplied at the High Ground Reservoir calculated and determined on the basis of the average daily issue of water for each month as measured by the meter fixed at the High Ground Reservoir, at the rates specified in the Agreement between the Secretary of State and the Maharaja of Mysore, that is to say,

For all water up to 2,000,000 gallons per day of 24 hours 7.65 annas per 1,000 gallons.

Above 2,000,000 up to 2,100,000 per day of 24 hours 7.60 annas per 1,000 gallons.

Above 2,100,000 up to 2,200,000 per day of 24 hours 7.55 annas per 1,000 gallons.

Above 2,200,000 up to 2,300,000 per day of 24 hours 7.50 anna per 1,000 gallons.

Above 2,300,000 up to 2,400,000 per day of 24 hours 7.45 annas per 1,000 gallons.

Above 2,400,000 up to 2,500,000 per day of 24 hours 7.38 annas per 1,000 gallons.

And for all water above 2,500,000 gallons per day at such rates as may hereafter be mutually agreed upon by the parties hereto

Provided always that the Commission shall pay for a minimum daily average of 2 million gallons per day at the rate of 7.65 annas per 1,000 gallons which obligation shall cease if by reason of any drought, accident or other unforeseen circumstances, beyond the control of the Maharaja, the Maharaja shall at any time hereafter be unable to supply the station with the quantity of water which is required to be supplied under his Agreement dated

with the Secretary of State. So long as such inability shall continue the Commission shall be liable to pay for only such quantity of water as is actually supplied.

2. The Commission shall enjoy full use of that portion of the distribution system known as the Combined System shown on the plan and detailed in the schedule attached to this Agreement. This distribution system shall remain the property of the Secretary of State but will be leased to the Commission at a nominal rental of Rs.5/- per annum.

The use of the said system will be permitted only as long as water is supplied to the Military areas and buildings as provided for in Clauses 7, 9 and 10 hereafter.

3. The said portion of the distribution system shall be maintained and renewed by and at the cost of the Commission who shall keep the system at all times in a proper and efficient state of repair. In the event of any dispute as to the necessity for a renewal or a repair of any portion of the said system the decision of the Engineer-in-Chief Army Headquarters shall be final and binding on both parties.

4. The Commission may if they so desire and with the prior concurrence of the Commander, Royal Engineers, Madras District, carry out at their own cost and expense any additions to the said

system which additions shall remain the property of the Commission.

5. The Commission may if they so desire and with the prior concurrence of the Commander, Royal Engineers, Madras District, carry out at their own cost and expense any alterations to the said system such as replacing an existing pipe by one of larger size, subject to the condition that if and when the Secretary of State resumes the use of the said system in accordance with the provisions of Clauses 2 and 9 the Commission will have no claim for any payment from the Secretary of State in respect of the expenditure incurred on, or the enhanced value ~~of~~ consequent on such alterations.

Any old materials so replaced shall become the sole property of the Commission.

6. The Commission shall supply to the Secretary of State either in bulk or distributed as hereinafter indicated filtered water suitable for drinking purposes conforming to the minimum bacteriological standard - absence of Lactose Fermenters in 50 cc. and downwards and to the chemical standard - total solids not exceeding 40 parts per 1,00,000.

If the purity of water delivered by the Maharaja to the Secretary of State falls below this standard the Commission shall chlorinate the water at the High Ground Reservoir as may be necessary and shall take all steps within their power to ensure that the water delivered by the Maharaja is brought up to the said standard.

7. The Commission shall supply to the Secretary of State subject to the conditions mentioned in Clause 8 a total quantity water up to a maximum of 2,50,000 gallons per day of twenty four hours provided always that in the event of any deficiency in the sources of supply by reason of scarcity of water, accident or other circumstances beyond the control of the Commission the supply may be restricted to a total daily quantity not less than one-tenth the total daily quantity delivered at the High Ground Reservoir.

8. If the Secretary of State requires water in excess of the maximum quantity mentioned in Clause 7 above, the Commission shall supply additional water provided always that it can be made available without any extra initial expenditure and without in-

head of not less than 7 feet.

At Point E.

25,000 gallons per day of 24 hours with a residual head of not less than 40 feet.

Subject to the proviso that the total amount demanded at Points A, B, C, D and E in any one day shall not exceed the maximum of 250,000 gallons.

Distributed Supply.

A distributed supply in accordance with local conditions shall be given to such buildings within the Civil and Military Station as shall be notified to the President, Municipal Commission, b the Garrison Engineer, Bangalore, from time to time.

11. The quantity of water delivered in bulk shall be measured by suitable meters fixed in a manner mutually agreed upon at each taking over point.

12. The said meters shall be furnished, fixed and maintained ir proper order and condition by the Secretary of State at his own cost.

13. The said meters shall be read by responsible officials of each party at a time and date to be mutually agreed upon and the Secretary of State shall pay monthly to the Commission for all water actually consumed as recorded by the said meters within 21 days of th presentation of the bill therefor.

14. If either party disputes the accuracy of any readings obtained under the preceding clause then the meter of which the accuracy is disputed shall be tested. The meter so tested shall be deemed to be correct if as a result of such test the meter is found to ~~be accurate~~ Comply with the following ~~limits~~:-

(clause 14) S.M. 194/47

The cost of such test shall be borne by the party at fault If a meter ceases to register, the consumption during the period until the meter is repaired or replaced shall be assessed by mutual agreement.

15. The Secretary of State shall pay for the water supplied

under Clause 7 of this Agreement at the following rates:-

(a) For Bulk Supply:-

At 7.65 annas per 1,000 gallons or such other rate that His Highness the Maharaja of Mysore may charge the Commission for delivery at the High Ground Reservoir plus 1.5 annas per 1,000 gallons charge for delivery to the taking over points.

(b) For Distributed Supply:-

At such rates and charges as may be imposed generally in the Civil and Military Station by the Municipal Commission under the powers of Section 43 of the Bangalore Municipal Act of 1897.

16. The sum paid under Clause 15 above shall be subject to the following proviso:-

If the total quantity of water ~~supplied in bulk and~~ consumed in any one month be less than a quantity equal to 1,80,000 gallons multiplied by the number of days in the said month the Secretary of State shall, subject to the provisions of Clause 7, pay to the Commission an additional sum for the difference of quantity at the rate in force under Clause 15 (a) above, except during the existence of any deficiency of water as described in Clause 7 when the Secretary of State shall pay only for the actual quantity of water received.

17. This agreement so far as it relates to the distribution of water to Military buildings and bulk supply points by the Commission shall continue in force for a period of 5 years from the date of its commencement and if not terminated on the expiration of the said period of 5 years it shall remain in force thereafter from year to year until it shall be determined at any time by either party giving to the other three calendar months notice in writing by registered post of their desire to determine it. If either party desires to determine this agreement at the expiration of the said period of 5 years notice of such desire shall be given at least 3 calendar months before the expiration of the said period of 5 years

18. This agreement shall come into effect from

From this latter date the agreement dated 1st February 1897 and its subsequent modifications ceases to be operative.

19. Should any difference arise between the parties hereto (the settlement of which is not hereinbefore otherwise provided for) as to the interpretation of any of the provisions of this agreement or anything otherwise howsoever arising hereunder, such difference shall be referred to the arbitration of an arbitrator to be agreed upon by the parties hereto and in default of agreement to an arbitrator to be appointed by the Hon'ble the Resident in Mysore and the decision of such arbitrator shall be final and the terms of the Indian Arbitration Act for the time being in force shall apply to any such reference.

Draft Agreement 'B'.

Memorandum of Agreement made this day of One thousand nine hundred and thirty between THE SECRETARY OF STATE FOR INDIA IN COUNCIL (hereinafter referred to as the Secretary of State which term shall include the Secretary of State party hereto, his successors in office and assigns) of the one part and the Municipal Commission of the Civil and Military Station of Bangalore represented by C.H.Cooke Esq. M.C., I.C.S. President and

the present Municipal Commissioners for the Civil and Military Station of Bangalore (hereinafter referred to as the Commission which term shall include the said Commissioners parties hereto, their successors in office and assigns) of the other part.

WHEREAS under an agreement dated the 1st of February 1897 as modified by subsequent agreements between

the Secretary of State and the Commission it was agreed that the Secretary of State should provide a supply of water for the use of the Commission from the Chamarajendra Reservoir on certain terms and conditions more fully set out in the said agreement and its modifications:

AND WHEREAS the supply of water from the Chamarajendra Reservoir was found to be inadequate to meet the requirements of the City and the Civil and Military Station of Bangalore in recent years.

AND WHEREAS under an agreement dated the
between the Secretary of State for India in Council and His Highness The Maharajah of Mysore, the Maharajah has agreed to supply to the High Ground Reservoir from the new reservoir constructed across the Arkavati River, below its confluence with the Kumudvati, on the Kagodi Road, near the village of Thippagondanahalli, all such quantity of filtered water that the Civil and Military Station may require subject to a maximum of 2 1/2 million gallons per day for the present on certain terms and conditions more fully set out in the said agreement.

AND WHEREAS the Secretary of

State

and determined on the basis of the average daily issue of water for each month as measured by the meter fixed at the High Ground Reservoir, at the rates specified in the agreement between the Secretary of State and the Maharajah of Mysore, that is to say,

For all water up to 2,000,000 gallons per day of 24 hours 7.65 annas/1000 Glns.

Above	2,000,000 up to 2,100,000	-do-	7.60 -do-
"	2,100,000 up to 2,200,000	-do-	7.55 -do-
"	2,200,000 up to 2,300,000	-do-	7.50 -do-
"	2,300,000 up to 2,400,000	-do-	7.45 -do-
"	2,400,000 up to 2,500,000	-do-	7.38 -do-

And for all water above 2,500,000 g.p.d. at such rates as may hereafter be mutually agreed upon by the parties hereto.

Provided always that the Commission shall pay for a minimum daily average of 2 million gallons per day at the rate of 7.65 annas per 1000 gallons which obligation shall cease if by reason of any drought, accident or other unforeseen circumstances, beyond the control of the Maharajah, the Maharajah shall at any time hereafter be unable to supply the

station

station with the quantity of water which is required to be supplied under his agreement dated with the Secretary of State. So long as such inability shall continue the Commission shall be liable to pay for only such quantity of water as is actually supplied.

2. The Commission shall enjoy full use of that portion of the distribution system known as the Combined System shown on the plan and detailed in the schedule attached to this agreement. This distribution system shall remain the property of the Secretary of State but will be leased to the Commission at a nominal rental of Rs.5/- per annum.

The use of the said system will be permitted only as long as water is supplied to the Military areas and buildings as provided for in Clauses 7, 9 and 10 hereafter.

3. The said portion of the distribution system shall be maintained and renewed by and at the cost of the Commission, who shall keep the system at all times in a proper and efficient state of repair. In the event of any dispute as to the necessity for a renewal or a repair of any portion of the said system the decision of

the

the Engineer-in-Chief, Army Headquarters shall be final and binding on both parties.

4. The Commission may if they so desire and with the prior concurrence of the Commander, Royal Engineers, Madras District carry out at their own cost and expense any additions to the said system which additions shall remain the property of the Commission.

5. The Commission may if they so desire and with the prior concurrence of the Commander, Royal Engineers, Madras District carry out at their own cost and expense any alterations to the said system such as replacing an existing pipe by one of larger size subject to the condition that if and when the Secretary of State resumes the use of the said system in accordance with the provisions of Clauses 2 and 9 the Commission will have no claim for any payment from the Secretary of State in respect of the expenditure occurred on or the enhanced value of such alterations.

Any old material so replaced shall become the sole property of the Commission.

6...

6. The Commission shall supply to the Secretary of State either in bulk or distributed as hereinafter indicated filtered water suitable for drinking purposes conforming to the minimum bacteriological standard - absence of Lactose Fermenters in 50 cc and downwards and to the chemical standard - total solids not exceeding 40 parts per 1,00,000.

If the purity of water delivered by the Maharajah to the Secretary of state falls below this standard the Commission shall chlorinate the water at the High Ground Reservoir as may be necessary and shall take all steps within their power to ensure that the water delivered by the Maharajah is brought up to the said standard.

7. The Commission shall supply to the Secretary of State subject to the conditions mentioned in Clause 8 a total quantity of water up to a maximum of 2,50,000 gallons per day of twentyfour hours provided always that in the event of any deficiency in the sources of supply by reason of scarcity of water, accident or other circumstances beyond the control of the Commission the supply may be

restricted

restricted to a total daily quantity not less than one tenth of the total daily quantity delivered at the H.G. Reservoir.

8. If the Secretary of State requires water in excess of the maximum quantity mentioned in Clause 7 above, the Commission shall supply additional water provided always that it can be made available without any extra initial expenditure and without in any way adversely affecting the general supply in the J.C. Station.

9. If the Commission at any time fails to supply the maximum quantity of water mentioned in Clause 7 above or such less quantity as may be demanded and if the reason for such failure is within the control of the Commission, then the Secretary of State after informing the Hon'ble The Resident in Mysore and the President Municipal Commission may assume control of such parts of the system and for such a period as will enable him to receive the required quantity of water.

10. The supply shall be partly in bulk and partly distributed as detailed hereinafter.

Bulk Supply.

Bulk Supply.

Bulk Supply shall be delivered at suitable taking over points marked A, B, C, D, and E. on the plan annexed hereto and situated as follows:-

Point A.

At the point where the 6" supply main to the Clive Lines reservoir takes off the Hosur road main.

Point B.

At the point where the 5" supply main to the Bairo Barracks area reservoir enters the Supply Depot.

Point C.

At the point where the 6" supply main to the Cornwallis Barracks area reservoir enters the Military Area.

Point D.

At the Reserve Lines pump house in Knoxpet.

Point E.

At the point in Cavalry Road where the 4" supply main to Assaye Lines takes off.

The supply shall be governed by the following conditions:-

At Point A.

42,000 gallons per day of 24 hrs with a residual head of not less than 50 feet.

At Point B.

At Point B.

50,000 gallons per day of 24 hours with a residual head of not less than 55 feet.

At Point C.

1,00,000 gallons per day of 24 hrs. with a residual head of not less than 50 feet.

At Point D.

40,000 gallons per day of 24 hours with a residual head of not less than 7 feet.

At Point E.

25,000 gallons per day of 24 hours with a residual head of not less than 40 feet.

Subject to the proviso that the total amount demanded at Points A, B, C, D & E in any one day shall not exceed the maximum of 250,000 Gallons.

Distributed Supply

A distributed supply in accordance with local conditions shall be given to such buildings within the G.T.. Station as shall be notified to the President, Unicipal Commission by the G.T., Bangalore from time to time.

11. The quantity of water delivered in bulk shall be measured by suitable meters fixed in a manner mutually agreed upon at each taking over point.

12...

12. The said meters shall be furnished, fixed and maintained in proper order and condition by the Secretary of State at his own cost.

13. The said meters shall be read by responsible officials of each party at a time and date to be mutually agreed upon and the Secretary of State shall pay monthly to the Commission for all water actually consumed as recorded by the said meters within 21 days of the presentation of the bill therefor.

14. If either party disputes the accuracy of any readings obtained under the preceding clause then the meter of which the accuracy is disputed shall be tested. The meter so tested shall be deemed to be correct if as a result of such test the meter is found to ~~be accurate~~ comply within the following ~~limits~~:-

(i) The error of the meter when registering the quantity of water supplied shall not exceed 2% above or below absolute accuracy between the following rates of flow:-

4" meter	88	g.per hr.	to 10000	g.p.hr.
6" "	165	"	" 20000	"

(ii) It shall operate under the following minimum rates of flow:-

4" meter	44	gallons	per	hour.
6" "	160	"	"	"

by one party to another. If a meter ceases to register, the consumption during the period until the meter is repaired or replaced shall

multiplied by the number of days in the said month the Secretary of State shall, subject to the provisions of Clause 7, pay to the Commission an additional sum for the difference of quantity at the rate in force under Clause 15(a)(i) above, except during the existence of any deficiency of water as described in Clause 7 when the Secretary of State shall pay only for the actual quantity of water received.

17. This agreement so far as it relates to the distribution of water to Military buildings and bulk supply points by the Commission shall continue in force for a period of 5 years from the date of its commencement and if not terminated on the expiration of the said period of 5 years it shall remain in force thereafter from year to year until it shall be determined at any time by either party giving to the other three calendar months notice in writing by registered post of their desire to determine it. If either party desires to determine this agreement at the expiration of the said period of 5 years notice of such desire shall be given at least 3 calendar months before the expiration of the said period of 5 years.

FROM

Resident Mysore,

Bangalore.

To

Polindia

Simla.

No. 9185 En. B. Dated 14th Sept. 1933.

Subject:- Bangalore Water Supply - Agreement.

S.N. 167 (R.)

Reference your Express Letter No.F.188-A/30, dated the 16th May 1933.

S.N. 193

2. (1)The Municipal Commission, Civil and Military Station, Bangalore, at their ordinary meeting held on the 27th July 1933, accepted the terms of the draft of an Agreement, in regard to the new Water Supply Scheme, between the Secretary of State for India and the Municipal Commission, submitted by the Commander Royal Engineers, Madras District.

S.N. 193/A (D)

A copy of the Municipal Commission's Resolution No.2, dated the 27th July 1933, on the subject, together with a copy of the draft Agreement referred to therein, is forwarded.

From

S. 6.

2(2) From paragraphs 15 and 16 of the draft Agreement it will be seen that an agreement has been reached in regard to the rate at which water shall be supplied to the military authorities and a minimum payment which they will be required to make irrespective of quantity of water consumed by them.

As regards the second point referred to in paragraph 1 of your Express Letter, the Municipal Commission have accepted all the conditions mentioned in paragraph 3 of letter from the Quarter Master General in India to Headquarters, Southern Command, No.36552/6(S.4), dated the 30th March 1933, with the exception of condition (e). At a Conference held on the 17th June 1933, at which Commander Royal Engineers, Madras District, and President of the Municipal Commission were present, it was agreed by Commander Royal Engineers that condition (g) might be omitted. The conditions are embodied in suitable form in paragraphs 2, 3, 4, 5 and 9 of the draft Agreement. It is understood that the local Military Authorities have recommended to Army Headquarters the withdrawal of condition (e) as they do not desire to do the work.

3. I enclose, in duplicate, the plan and schedule referred to in paragraph 2 of the draft Agreement. The plan referred to in paragraph 10 will be obtained from Headquarters, Madras District, and forwarded to you in due course. I recommend that the Government of India may be pleased to ratify the Agreement, which should come into force with effect from the 16th March 1933, i.e., the date on which the Agreement between the Secretary of State and the Mysore Government should come into operation. See in this connection my letter No.9183, dated the 14th September 1933. There was difference of opinion here as to what that date should be. It has only just been settled by mutual agreement that 16th March 1933 should be the date.

4. In paragraph 1 of the Express Letter under reply, the Government of India state that they consider that the payment of the amount of Rupees one lakh from the Reserve Fund to the Municipal Commission can ordinarily be made only when the control of the water supply is transferred to them and the necessary agreement superseding the present one is concluded; and that before control is transferred agreement would be necessary on the two points mentioned therein.

As agreement on those two points has now been reached and as the terms of the draft Agreement of which copy is enclosed, have been accepted by the Commander Royal Engineers, Madras District, and the Municipal Commission of the Civil and Military Station, I would request that the Government of India may be pleased as a special case to place immediately at the disposal of the President, Municipal Commission, Rs.1,00,000/- (Rupees one lakh) from the Reserve Fund, as a sum of Rs.1,10,400/- has already been spent by the Municipal Commission towards the purchase and fixing of meters in the Station.

for RESIDENT IN MYSORE.

GS.

DRAFT AGREEMENT 'B'.

Memorandum of Agreement made this day of One Thousand Nine Hundred and Thirty between the Secretary of State for India in Council (hereinafter referred to as the Secretary of State which term shall include the Secretary of State party hereto, his successors in office and assigns) of the one part and the Municipal Commission of the Civil and Military Station of Bangalore represented by G. H. Cooke, Esq., M.C., I.C.S., President and

the present Municipal Commissioners for the Civil and Military Station of Bangalore (hereinafter referred to as the Commission which term shall include the said Commissioners parties hereto, their successors in office and assigns) of the other part.

WHEREAS under an Agreement dated the 1st of February 1897 as modified by subsequent Agreements between the Secretary of State and the Commission it was agreed that the Secretary of State should provide a supply of water for the use of the Commission from the Chamrajendra Reservoir on certain terms and conditions more fully set out in the said Agreement and its modifications:

And whereas the supply of water from the Chamrajendra Reservoir was found to be inadequate to meet the requirements of the City and the Civil and Military Station of Bangalore in recent years:

and

And whereas under an Agreement dated the
between the Secretary of State for India in Council and His Highness the Maharaja of Mysore, the Maharaja has agreed to supply to the High Ground Reservoir from the new reservoir constructed across the Arkavati River, below its confluence with the Kumudvati, on the Magadi Road, near the village of Thippagondanahalli, all such quantity of filtered water that the Civil and Military Station may require subject to a maximum of 2¼ million gallons per day for the present on certain terms and conditions more fully set out in the said Agreement:

And whereas the Secretary of State has agreed and does hereby agree to supply to the Commission the water delivered to him at the High Ground Reservoir by the Maharaja of Mysore and to give them the full benefit of the above Agreement and any modifications that may hereinafter be made in it subject to the conditions relating to the supply of water to the Military Authorities as hereinafter provided:

And whereas the Secretary of State has agreed and does hereby agree to transfer the control of the distribution of water from the High Ground Reservoir to the Commission and whereas the said Commission have agreed to assume the responsibility for the distribution throughout the Civil and Military Station of Bangalore from

Now these presents witness and it is mutually agreed between the parties hereto as follows:-

1. In consideration of the Secretary of State supplying water to the Commission, the Commission shall pay to the Secretary of State, or as the Secretary of State may direct

for

quantity of water as is actually supplied.

2. The Commission shall enjoy full use of that portion of the distribution system known as the Combined System shown on the plan and detailed in the schedule attached to this Agreement. This distribution system shall remain the property of the Secretary of State but will be leased to the Commission at a nominal rental of Rs.5/- per annum.

The use of the said system will be permitted only as

The Secretary of State shall have the right to resume full use of any portion of the said system necessary to supply water to a particular area (other than the existing Military areas) in which it is required to locate Military personnel.

~~maintained and renewed~~ by and at the cost of the Commission who shall keep the system at all times in a proper and efficient state of repair. In the event of any dispute as to the necessity for a renewal or a repair of any portion of the said system the decision of the Engineer-in-Chief Army Headquarters shall be final and binding on both parties.

4. The Commission may if they so desire and with the prior concurrence of the Commander, Royal Engineers, Madras District, carry out at their own cost and expense any additions to the said system which additions shall remain the property of the Commission.

5. The Commission may if they so desire and with the prior concurrence of the Commander, Royal Engineers, Madras District, carry out at their own cost and expense any alterations to the said system such as replacing an existing pipe by one of larger size, subject to the condition that if and when the Secretary of State resumes the use of the said system in accordance with the provisions of Clause 2 (

the

the Commission will have no claim for any payment from the Secretary of State in respect of the expenditure incurred on, or the enhanced value consequent on, such alterations.

Any old material so replaced shall become the sole property of the Commission.

6. The Commission shall supply to the Secretary of State either in bulk or distributed as hereinafter indicated filtered water suitable for drinking purposes conforming to the minimum bacteriological standard - absence of Lactose Fermenters in 50 cc. and downwards and to the chemical standard - total solids not exceeding 40 parts per 1,00,000.

If the purity of water delivered by the Maharaja to the Secretary of State falls below this standard the Commission shall chlorinate the water at the High Ground Reservoir as may be necessary and shall take all steps within their power to ensure that the water delivered by the Maharaja is brought up to the said standard.

7. The Commission shall supply to the Secretary of State subject to the conditions mentioned in Clause 8 a total quantity of water up to a maximum of 2,50,000 gallons per day of twenty four hours provided always that in the event of any deficiency in the sources of supply by reason of scarcity of water, accident or other circumstances beyond the control of the Commission the supply may be restricted to a total daily quantity not less than one-tenth of the total daily quantity delivered at the High Ground Reservoir.

8. If the Secretary of State requires water in excess of the maximum quantity mentioned in Clause 7 above, the Commission shall supply additional water provided always

that

that it can be made available without any extra initial expenditure and without in any way adversely affecting the general supply in the Civil and Military Station.

9. If the Commission at any time fails to supply the maximum quantity of water mentioned in Clause 7 above or such less quantity as may be demanded and if the reason for such failure is within the control of the Commission, then the Secretary of State after informing the Hon'ble the Resident in Mysore and the President, Municipal Commission, may assume control of such parts of the system and for such a period as will enable him to receive the required quantity of water.

10. The supply shall be partly in bulk and partly distributed as detailed hereinafter.

Bulk Supply.

Bulk supply shall be delivered at suitable taking over points marked A, B, C, D and E on the plan annexed hereto and situated as follows:-

Point A. At the point where the 6" supply main to the Clive Lines reservoir takes off the Hosur Road main.

Point B. At the point where the 5" supply main to the Baird Barracks area reservoir enters the Supply Depot.

Point C. At the point where the 6" supply main to the Cornwallis Barracks area reservoir enters the Military Area.

Point D. At the Meeanee Lines Pump House in Knonpet.

Point E. At the point in Cavalry Road where the 4" supply main to Assaye Lines takes off.

The

measured by suitable meters fixed in a manner mutually agreed upon at each taking over point.

12. The said meters shall be furnished, fixed and maintained in proper order and condition by the Secretary of State at his own cost.

13. The said meters shall be read by responsible officials of each party at a time and date to be mutually agreed upon and the Secretary of State shall pay monthly to the Commission for all water actually consumed as recorded by the said meters within 21 days of the presentation of the bill therefor.

14. If either party disputes the accuracy of any readings obtained under the preceding clause then the meter of which the accuracy is disputed shall be tested. The meter so tested shall be deemed to be correct if as a result of such test the meter is found to comply with the following:-

(i) The error of the meter when registering the quantity of water supplied shall not exceed 2% above or below absolute accuracy between the following rates of flow:-

4" meter 88 g. per hr. to 10,000 g. per hr.

6" " 165 -do- " 20,000 -do-

(ii) It shall operate under the following minimum rates of flow:-

4" meter 44 gallons per hour.

6" " 160 -do-

The cost of such test shall be borne by the party at fault. If a meter ceases to register, the consumption during the period until the meter is repaired or replaced shall be assessed by mutual agreement.

15. The

15. The Secretary of State shall pay for the water supplied under Clause 7 of this Agreement at the following rates:-

(a) For Bulk Supply:-

(i) At 7.65 annas per 1,000 gallons or such other rate that His Highness the Maharaja of Mysore may charge the Commission for delivery at the High Ground Reservoir.

plus

(ii) 1.5 annas per thousand gallons charge for delivery to the taking over points.

(b) For Distributed Supply:-

At such rates and charges as may be imposed generally in the Civil and Military Station by the Municipal Commission under the powers of Section 43 of the Bangalore Municipal Law of 1897.

16. The sum paid under Clause 15 above shall be subject to the following proviso:-

If the total quantity of the Bulk-supply of water consumed in any one month be less than a quantity equal to 1,80,000 gallons multiplied by the number of days in the said month the Secretary of State shall, subject to the provisions of Clause 7, pay to the Commission an additional sum for the difference of quantity at the rate in force under Clause 15 (a) (i) above, except during the existence of any deficiency of water as described in Clause 7 when the Secretary of State shall pay only for the actual quantity of water received.

17. This agreement so far as it relates to the distribution

of water to Military buildings and bulk supply points by the Commission shall continue in force for a period of 5 years from the date of its commencement and if not terminated on the expiration of the said period of 5 years it shall remain in force thereafter from year to year until it shall be determined at any time by either party giving to the other three calendar months notice in writing by registered post of their desire to determine it. If either party desires to determine this agreement at the expiration of the said period of 5 years notice of such desire shall be given at least 3 calendar months before the expiration of the said period of 5 years.

18. This agreement shall come into effect from From this latter date the agreement dated 1st February 1897 and its subsequent modifications cease to be operative.

19. Should any difference arise between the parties hereto (the settlement of which is not hereinbefore otherwise provided for) as to the interpretation of any of the provisions of this agreement or anything otherwise howsoever arising hereunder, such difference shall be referred to the arbitration of an arbitrator to be agreed upon by the parties hereto and in default of agreement to an arbitrator to be appointed by the Hon'ble the Resident in Mysore and the decision of such arbitrator shall be final and the terms of the Indian Arbitration Act for the time being in force shall apply to any such reference.

IN WITNESS HEREOF.....

SUPERINTENDENT, RESIDENT'S OFFICE.

J. E

4. Will you please obtain from the Municipal Commission the assurance required in para 2 and their views upon the matter raised in para 3 above. If the condition made in para 3 is accepted, it is suggested that the following amendment to draft agreement B. will meet the case:-

Add at the end of Clause 2.-

"The Secretary of State shall have the right to resume full use of any portion of the said system necessary to supply water to a particular area, (other than the existing military areas) in which it is required to locate military personnel".

5. In view of the fact that Agreement B. is now being scrutinised by A.H.Q., a very early reply is requested.

I have the honour to be,
Sir,
Your obedient servant,

for Major-General,
Commander, Madras District.
